

ACCESSORY EQUIPMENT FOR FORK LIFT TRUCKS

Cold resistant and adaptive: Accessory products equipped with load handling devices are suited for fork lift trucks in manually controlled high rack warehouses as well as for narrow-aisle trucks. They can be used, for example, for the manual picking of goods and in cold-storage areas with temperatures up to minus 40° C.

PRODUCT FEATURES

- Usable in combination with all conventional FEM-interfaces or individually adjustable to the respective industrial truck
- Available with additional lifting unit
- Suitable for single- and multi-deep storage
- Mounting bracket can be fitted with different load handling devices
- Preparation and installation of load recognition device and sensor technology
- Inclination unit for load discharge onto gravity conveyor
- Available with electric or hydraulic drive
- Available with fork adjustment (symmetric/asymmetric) for handling of different load carriers
- Belt or chain conveyor with or without lifting device
- Inclination unit for the reception of load carriers, for example, of belt conveyors or rotation devices
- Adjustment unit: moving of complete telescopic fork unit on top of the lifting unit

CUSTOMER BENEFITS

- Individually adjustable to the load unit and particular application
- Solid design ensures extreme reliability
- Guaranteed availability of spare parts for the product's entire lifecycle
- Energy efficient
- Low maintenance costs
- Highly dirt resistant
